Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians. North Carolina has a serious problem with mercury contamination from coal_fired plants. I have yet not heard Duke power adress this problem. It is time to wake up and work together for cleaner air and water!

Sincerely,

Larry Mabry
